# MegaDoc v.1.7

Megasoft2000 Ltd.

Palm Software Division (PSD). Ulyanovsk, Russia.

Platform: Palm OS 3.0, 3.1, 3.3, 3.5 (B/W), 3.5 (Color)

## System description:

MegaDoc is a multifunctional program which is intended for viewing and editing main formats: .txt, .rtf, .doc, .html/htm, .pdb (Palm doc) and Memo (records of Memo Pad application). With this powerful program you gain control over desktop-like text formatting and editing features. It includes fonts and alignments selection, Undo/Redo operations and more.

MegaDoc Manager allows to convert these formats in the PC and to transfer them via its conduit direct to the Palm device. After viewing and editing the selected documents can be synchronized to the PC.

#### System installation:

# Note! Before installation make sure the date on your Palm device is valid (use Preferences application

Before installing MegaDoc v.1.7 you must delete the previous version on your PC. Use "Uninstall MegaDoc" program to do this. Delete MegaDoc.prc application on your PDA (all your documents will be safe). To install the new version of "MegaDoc Manager" start "Setup.exe" program and install the applications on your PDA after this:

- MegaDoc.prc
- Commands.doc.pdb

#### System requirements:

Attention! To move files with ". Doc" extension your PC should have MS Word installed. You can't move or get documents in MegaDoc if you don't have this program.

# MegaDoc Manager

cradle and press the "Synchronization" button, as result all selected files will be transferred to the Palm device.

#### Upper panel

MegaDoc allows you to do 2 types of document filter.

- 1. **Filter** documents are filtered according to extension.
- 2. Categories documents may be organized

in categories that can be changed or added. Switching of this option is done in "MegaDoc preferences".

To change the category use "Drag and Drop" function, that is pull the chosen document into the filter list box and release. Choose the needed category and your document will move to this category.

The informational button - "Edit/Read" box indicates document mode at opening. To edit the document set the "Edit" mode by pressing the box, To read the document without editing press the "Read" mode in the box.

#### Lower panel

- 1. New document
- 2. Document search
- 3. Rename document
- 4. Delete document
- 5. Beam the document to analogical device
- 6. Document sorting according to
  - Name
  - Туре
  - Size
  - Date

Use "Drag and Drop" for items 3,4,5

#### **Document synchronization to PC:**

To move documents to your PC put the "HotSync" symbol marker in the document bar. This marker guarantees the marked document synchronization to your PC after pressing the synchronization button on your PDA.

The documents that have "-" sign can't be synchronized to your PC because they are the records of "Memo" application, that synchronizes automatically.

#### Edit document

Set the "Edit" mode and open the document before editing. Some functions can be unavailable depending on the document extension. The upper menu is adjustable; the chosen instruments are unchangeable until you change (choose) another instrument.
