About MegaTets

MegaTets is an exciting action game. Throughout the game, Tetris pieces fall from the top to the bottom of the playing area. When Tetris pieces form a solid row of blocks across the playing area, that row vanishes. This is the only way to remove blocks, that is, you should try to form solid rows whenever possible. The game ends when the pieces stack up to the top of the playing area. You can manipulate a piece only when it is falling. Falling pieces may be rotated, moved horizontally, or dropped to the bottom of the playing area.
